

Hospital Design and Care Delivery

A Workshop by Nora Colman MD, Children's Healthcare of Atlanta

19 and 20 June 2024

at the Swiss Center for Design and Health in Nidau near Biel/Bienne

The workshop at the SCDH will give you a comprehensive understanding of how to design the hospitals of the future by integrating patient safety theory, operational efficiency, simulation techniques, end-user engagement strategies, and developing a compelling business case.

On the first day, you will learn about the latest trends in health-care design; on the second day, you will use Switzerland's largest extended reality simulation area to evaluate and optimise spaces and processes.
